

Overview

The code in this replication package uses Stata to construct the various input data files and run the analysis code to generate the 9 figures and 5 tables in the main text and the 9 figures and 10 tables in the online Appendix for the manuscript “Do Conditional Cash Transfers Improve Economic Outcomes in the Next Generation?” The replicator should expect the code to take approximately three hours to run.

Data Availability and Provenance Statements

Statement about Rights

YES ☐ I certify that the author(s) of the manuscript have legitimate access to and permission to use the data used in this manuscript.

- YES ☐ I certify that the author(s) of the manuscript have documented permission to redistribute/publish the data contained within this replication package. Appropriate permissions are documented in the [LICENSE.txt](#) file.

Summary of Availability

All data used in the paper was downloaded from publicly available websites detailed below, with the exception of the file `fams_fase_20134xloc_f.dta`, which contains information on the enrollment (number of) of beneficiary households of the Progresa program at the community level for each community for each bimester from 1997 through the fourth bimester of 2013. This information was provided by Progresa program officials through the transfer of electronic files to Susan W. Parker in the fall of 2013. The Progresa program (later renamed as Oportunidades and then Prospera) was formally eliminated in 2019.

Details on each Data Source:

1. Mexican Population and Census Data 1990, 2000 and 2010. Main data files were downloaded through data extracts at <https://international.ipums.org/international/> but are publicly available directly from the Mexican government at <https://www.inegi.org.mx/programas/ccpv/>.

2. Mexican Population Council: Data on Marginality Index 1995. Downloaded `Base_Indice_de_marginacion_municipal_90-15.csv` from <https://www.gob.mx/conapo/documentos/indices-de-marginacion-1990-2010>

3. Data on constructed number of households in each municipality from 1990 and 2000 Mexican Population Census. Downloaded from inegi.gob.mx

4. Homicides at the municipal level from 1990 to 2015. Downloaded from inegi.gob.mx

5. Schools at the municipal level between 1990 and 2010. Downloaded from <http://www.snim.rami.gob.mx/>.

6. Presidential vote by party in the 1994 elections. Downloaded from https://portalanterior.ine.mx/archivos3/portal/historico/contenido/Historico_de_Resultados_Electorales/

7. Number of Progresa beneficiaries by locality by bimester from September/October 1997 through July/August 2013. Ministry of Social Development. Electronic files. fams_fase_20134xloc_f.dta

Computational requirements

Software Requirements

- Stata (code was last run with version 16)

Memory and Runtime Requirements

Summary

Approximate time needed to reproduce the analyses on a standard 2021 laptop:

3 hours

Details

The code was last run on a laptop with the below specifications:

Device name DESKTOP-C1L2378

Processor Intel(R) Core(TM) i7-10875H CPU @ 2.30GHz 2.30 GHz

Installed RAM 64.0 GB (63.8 GB usable)

System type 64-bit operating system, x64-based processor

Description of programs/code

All programs are in Stata.

- Programs/setup_dataprep_analysis.do
 - a) sets up the working environment,
 - b) runs all of the data preparation programs which extract and reformat all datasets referenced (located in /01_dataprep)
 - c) runs all of the analysis programs (located in /02_dataanalysis.) that generate all tables and figures both in the main body of the article and the Appendix.

Instructions to Replicators

- Edit programs/00_setup_dataprep_analysis.do to adjust the default path on line 12.
- Run programs/00_setup_dataprep_analysis.do.lines 1 to 42 for setup.
- Unzip file 01dataprep_programs.zip to subdirectory programs/01_dataprep
- Unzip file 02dataanalysis_programs.zip to subdirectory programs/02_dataanalysis
- Unzip file 01dataprep_data.zip to subdirectory data/01_dataprep.
- Unzip file 02dataprep_data.zip to subdirectory data/02_dataanalysis.
- Unzip file shape_data.zip to subdirectory data/Shapefiles.
- Run 00_setup_dataprep_analysis from lines 43 onward to construct databases and obtain all results for data and tables in the paper.

List of tables and programs

The provided code reproduces all tables and figures in the paper.

Figure/Tab le #	Program	Line Number	Output file	Note

*.out files can be read in Excel. Below is the mapping of output files to Table 2-5 and Appendix Tables 3-9

1. Table 2:
 - a. Columns 1-12 in men.out correspond to 2010 Men's results.
 - b. Columns 1-4 in men1990.out correspond to 1990 Men's results.
 - c. Columns 1-12 in women.out correspond to 2010 Women's results.
 - d. Columns 1-4 in women1990.out correspond to 1990 Women's results.
2. Table 3:
 - a. Columns 13-24 in men.out correspond to 2010 Men's results.
 - b. Columns 5-8 in men1990.out correspond to 1990 Men's results.
 - c. Columns 13-24 in women.out correspond to 2010 Women's results.
 - d. Columns 5-8 in women1990.out correspond to 1990 Women's results.
3. Table 4:
 - a. Columns 25-33 in men.out correspond to 2010 Men's results
 - b. Columns 9-10 in men1990.out correspond to 1990 Men's results.
 - c. Columns 25-33 in women.out correspond to 2010 Women's results.
 - d. Columns 9-10 in women1990.out correspond to 1990 Women's results.
4. Table 5:
 - a. Columns 34-45 in men.out correspond to 2010 Men's results
 - b. Columns 11-12 in men1990.out correspond to 1990 Men's results.

- c. Columns 34-45 in women.out correspond to 2010 Women's results.
 - d. Columns 11-12 in women1990.out correspond to 1990 Women's results.
- 5. Appendix Table 3:
 - a. Columns 46-54 in men.out correspond to 2010 Men's results.
 - b. Columns 13-15 men1990.out correspond to 1990 Men's results.
 - c. Columns 46-54 and 70-72 in women.out correspond to 2010 Women's results.
 - d. Columns 13-15 and 21 in women1990.out correspond to 1990 Women's results.
- 6. Appendix Table 4:
 - a. Columns 55-66 in men.out correspond to 2010 Men's results.
 - b. Columns 16-19 in men1990.out correspond to 1990 Men's results.
 - c. Columns 55-66 in women.out correspond to 2010 Women's results.
 - d. Columns 16-19 in women1990.out correspond to 1990 Women's results.
- 7. Appendix Table 5:
 - a. Columns 1 to 6 in index.out correspond to Row A results in Appendix Table 5
 - b. Columns 7 to 12 in index.out correspond to Row B results in Appendix Table 5
 - c. Columns 13 to 18 in index.out correspond to Row C results in Appendix Table 5
 - d. Columns 19 to 24 in index.out correspond to Row D results in Appendix Table 5
- 8. Appendix Table 6: qvalues.xls Men: Row 11 and 13 Women: Row 22 and 24
- 9. Appendix Table 7:
 - a. Odd columns in men_alt.out correspond to Column 1 in Appendix Table 7
 - b. Odd columns in women_alt.out correspond to Column 3 in Appendix Table 7
 - c. Even columns in men_alt.out correspond to Column 2 in Appendix Table 7
 - d. Even columns in women_alt.out correspond to Column 4 in Appendix Table 7
- 10. Appendix Table 8:
 - a. Main Results Columns 1 to 3 in Appendix Table 8 copy main results from Tables 2 through 5.
 - b. Columns 1-5 in men_controls.out correspond to Specification results (Columns 4 to 8) for A. Years of Education
 - c. Columns 6-10 in men_controls.out correspond to Specification results (Columns 4 to 8) for B. At Least Some Middle
 - d. Columns 11-15 in men_controls.out correspond to Specification results (Columns 4 to 8) for C. Working
 - e. Columns 16-20 in men_controls.out correspond to Specification results (Columns 4 to 8) for D. Working for Wage
 - f. Columns 21-25 in men_controls.out correspond to Specification results (Columns 4 to 8) for E. Monthly Labor Earnings
 - g. Columns 26-30 in men_controls.out correspond to Specification results (Columns 4 to 8) for F. Housing Index
 - h. Columns 31-35 in men_controls.out correspond to Specification results (Columns 4 to 8) for G. Durable Goods Index
 - i. Columns 36-40 in men_controls.out correspond to Specification results (Columns 4 to 8) for H. Cross Muni Migration
 - j. Columns 41-45 in men_controls.out correspond to Specification results (Columns 4 to 8) for I. Urban Residence
- 11. Appendix Table 9:
 - a. Main Results Columns 1 to 3 in Appendix Table 8 copy main results from Tables 2 through 5.

- b. Columns 1-5 in women_controls.out correspond to Specification results (Columns 4 to 8) for A. Years of Education
- c. Columns 6-10 in women_controls.out correspond to Specification results (Columns 4 to 8) for B. At Least Some Middle
- d. Columns 11-15 in women_controls.out correspond to Specification results (Columns 4 to 8) for C. Working
- e. Columns 16-20 in women_controls.out correspond to Specification results (Columns 4 to 8) for D. Working for Wage
- f. Columns 21-25 in women_controls.out correspond to Specification results (Columns 4 to 8) for E. Monthly Labor Earnings
- g. Columns 26-30 in women_controls.out correspond to Specification results (Columns 4 to 8) for F. Housing Index
- h. Columns 31-35 in women_controls.out correspond to Specification results (Columns 4 to 8) for G. Durable Goods Index
- i. Columns 36-40 in women_controls.out correspond to Specification results (Columns 4 to 8) for H. Cross Muni Migration
- j. Columns 41-45 in women_controls.out correspond to Specification results (Columns 4 to 8) for I. Urban Residence
